

I'm excited about you joining the course and all the cool things we will do together. I wanted to let you know about an eBook I wrote to go along with this course and the specialization in general. *The Elements of Data Analytic Style* that covers a ton of material from all 9 courses in the Data Science Specialization. It may be a useful resource to you as you get started and work your way through the courses.

You can get it on Leanpub (\$10 recommended).
